Ameco Medical Industries

Catheters from Doctors to Doctors

The CEO of AMECO MEDICAL and most of the partners are physicians who practice medicine for a quite long time where they had experienced the use of catheters in the medical field. In 1995, the group decided to go for manufacturing catheters. Dialysis catheters were the first to think about. Being physicians, the catheters designed in so sensible design to meet what physicians really need. Urology, central venous, sheath introducers and angiographic catheters are now among product range. New components are added to the range: scaled dispenser, guiding Y connector, haemostatic arterial needle connector. The company is CE, ISO 13486, FDA approved, Canadian, Brazilian, Russian,..... registered.

MediBeacon

MediBeacon develops proprietary, non-invasive, real-time monitoring systems for kidney function, gastrointestinal permeability and other light-activated diagnostics. MediBeacon’s transdermal GFR monitor and fluorescent tracer agent are used to measure Glomerular Filtration Rate (GFR) in preclinical research. The device allows to measure and track GFR over time, without requiring the animal to be restrained. The system obviates the need for blood sampling, urine collection, and laboratory assays and thus enables superior trial design. Use of the technology enhances preclinical kidney therapeutic assessment, nephrotoxicity evaluation and fundamental understanding of kidney function in animals.

Medikit Co., Ltd.

This year the innovators of Medikit proudly introduce the Symetrex Long Term Hemodialysis Catheter, engineered and designed to preserve access. Symetrex high flow catheter with unique anti-wall suction design to produce low recirculation, RF tipping technology that meets the demands of the clinician. As well as Symetrex we will also be exhibiting Medikit’s flagship product Split Cath. The most innovative long-term dialysis catheter design in the last 15 years. Rounding off the dialysis line Medikit also offers DuraLock-C, an antibacterial anticoagulant catheter locking solution. Duralock is provided in pre-filled syringes packed and sterilized in Tyvek pouches for a more efficient off dialysis protocol.

Website: www.medikit.co.jp/english/index.html

MaXimus

MaXimus is an intelligent system intended for controlling diagnosis treatment and business processes in the medical corporation. MaXimus is a cloud information system intended for effective management in healthcare and built on telemmedicine technologies: automatic data collection, diagnosis and treatment planning, patients condition monitoring, consultation, analytical registers, staff control and training. This is a structured collective experience, integration of science, education and regulations. The system is used in nephrology and dialysis areas, inpatient and outpatient units, laboratories, ICUs and Nefrosovet surgery rooms. MaXimus is a remote support and development, localization and scaling of multidisciplinary medical activity in Russia and abroad.

WEGO Blood Purification Business Group .....................................................Booth: 4.141
Established in 2004, WEGO Blood Purification Business Group is devoted to provide products and service for blood purification. We have six subsidiaries and cooperate with two international medical enterprises: Terumo and Nikkiso. With hemodialysis, Peritoneal dialysis and dialysis clinics as our strategic orientation, we offer the complete blood purification related products and service to serve global kidney disease patients wholeheartedly.
